

## Art Spectrum Heavy Duty Stretcher Bars (1.5" deep x 2" wide)

Art Spectrum Heavy Duty Stretcher Bars are approximately 2"x1.5" and are designed for larger work, especially for lightly or not framed work. The wider section has a double tongue to give support normally provided by the frame. These bars are made from carefully selected kiln dried, knot free pine. Wedges can be provided, included in the price. Bracing is required for bars over 36" in length. Prices below are per pair:

Bar Size:	Price:
8" (204mm)	\$6.29

### Bracing for Heavy Duty Stretcher Bars

Bracing is required for bars over 36" in length. Single length bracing is coded in white, one brace the length of the bar is used for frames up to 36". Cross braces are required for frames when both bars measure over 36", they are coded in purple and yellow and one of each colour is required to form the cross brace.

**Custom sizes also available, please enquire for details**
